### **4. FIRST AID MEASURES**

If inhaled : Move to fresh air in case of accidental inhalation of fumes from overheating or combustion.  
If not breathing, give artificial respiration.  
If breathing is difficult, give oxygen.  
Call a physician.

In case of skin contact : The material is not likely to be hazardous by skin contact, but cleaning the skin after use is advisable.  
Cool skin rapidly with cold water after contact with molten material.  
Do not peel polymer from the skin.  
Obtain medical treatment for thermal burn.

In case of eye contact : In case of contact, immediately flush eyes with plenty of water for at least 15 minutes.  
Call a physician.

If swallowed : No specific intervention is indicated.  
Consult a physician if necessary.

Most important symptoms and effects, both acute and delayed : None known.

Notes to physician : Treat symptomatically.

---

### **5. FIREFIGHTING MEASURES**

Suitable extinguishing media : Water  
Foam  
Dry chemical  
Carbon dioxide (CO<sub>2</sub>)

Specific hazards during fire-fighting : Combustible  
Large molten masses may ignite spontaneously in air.  
Water quenching is good practice.  
Minimize the generation and accumulation of dust.  
Material in pellet form may accumulate static charge when poured from one container to another.  
Failure or malfunction of temperature control systems on processing equipment, such as extruders, may create explosion hazards.

Hazardous combustion products : Hazardous combustion products may include:  
Carbon monoxide  
carbon dioxide  
(see also section 10)

Version 1.0	Revision Date: 2025/07/25	SDS Number: 300000005790	Date of last issue: - Date of first issue: 2025/07/25
----------------	------------------------------	-----------------------------	--

Specific extinguishing methods : Evacuate personnel and keep upwind of fire.  
 Special protective equipment for firefighters : Wear self-contained breathing apparatus and protective suit.

**6. ACCIDENTAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures : Spilled material is a slipping hazard.  
 Environmental precautions : Do not discharge to streams, ponds, lakes or sewers.  
 Methods and materials for containment and cleaning up : Spills of fine material should be cleaned using gentle sweeping or vacuuming. Cleaning methods (e.g. compressed air) which can generate potentially combustible dust clouds should not be used.  
 Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.  
 Use only non-sparking tools.

**7. HANDLING AND STORAGE**

**Handling**

Advice on safe handling : Open container only in well-ventilated area.  
 Wash hands thoroughly after handling.  
 Provide appropriate exhaust ventilation at dryers, machinery and at places where dust or volatiles can be generated.  
 Do not breathe dust.  
 Pneumatic conveying and other mechanical handling operations can generate combustible dust.  
 Minimize the generation and accumulation of dust.  
 Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces.

Avoidance of contact : Strong acids  
 Strong bases  
 Strong oxidizing agents

**Storage**

Conditions for safe storage : Store in a cool, dry place.  
 Keep container closed to prevent contamination.  
 Keep in an area equipped with sprinklers.

**8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

Dust (inhalable and respirable fraction)	Not Assigned	TWA (Respirable particulate matter)	3 mg/m3	ACGIH
		TWA (Inhalable particulate matter)	10 mg/m3	ACGIH

**Engineering measures** : General mechanical ventilation is normally adequate but use local exhaust where necessary to maintain exposures below acceptable limits.  
Use local exhaust to completely remove vapors and fumes liberated during hot processing from the work area.

**Personal protective equipment**

**Respiratory protection** : A respiratory protection program that meets country requirements must be followed whenever workplace conditions warrant respirator use.

Consult the respirator manufacturer to determine the appropriate type of equipment for a given application. Observe respirator use limitations specified by the manufacturer. Where there is potential for airborne exposures in excess of applicable limits, wear approved respiratory protection with dust/mist cartridge.

**Eye/face protection** : Wear safety glasses with side shields.  
Wear tightly fitting chemical splash goggles and face shield when possibility exists for eye and face contact due to splattering or splashing of molten material.  
A full-face mask respirator provides protection from eye irritation.

**Skin and body protection** : If there is a potential for contact with hot/molten material wear heat resistant clothing and footwear.

**Hand protection**

**Remarks** : Wear leather or cotton gloves when grinding, sawing, routing, drilling or sanding. When handling hot material, use heat resistant gloves.
