

Polyethylene

BorSafe™ HE3497-LS

Brown high density Polyethylene compound for the coextrusion of identifying stripes on black PE100 pipes

Description

BorSafe HE3497-LS is a bimodal polyethylene compound produced by the advanced Borstar technology.

It's fully stabilized against thermal degradation and the die build-up during extrusion is minimized. Furthermore, it has a highly covered pigment that gives a bright colored stripe even when extruded as a thin layer on a black pipe. It also contains UV-stabilizer.

Applications

BorSafe HE3497-LS recommended for the production of identifying stripes of black pipes produced from BorSafe HE3490-LS:

Sewerage

Physical Properties

Property	Typical Value	Test Method
	Data should not be used for specification work	
Density	953 kg/m ³	ISO 1183
Melt Flow Rate (190 °C/5,0 kg)	0,30 g/10min	ISO 1133

Storage

BorSafe HE3497-LS should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

Safety

The product is not classified as a dangerous preparation.

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.

Please see our Safety Data Sheet for details on various aspects of safety, recovery and disposal of the product, for more information contact your Borealis representative.
