

**Polypropylene**

**HG420FB**

Polypropylene Homopolymer

## Description

**HG420FB** is a polypropylene homopolymer intended for fibre applications

## Applications

**HG420FB** is recommended for

Spunbonded nonwovens

## Special features

**HG420FB** is optimised to deliver:

Controlled rheology  
Very good flow

Optimal product consistency  
Excellent processability

## Physical Properties

| Property                        | Typical Value                                  | Test Method |
|---------------------------------|------------------------------------------------|-------------|
|                                 | Data should not be used for specification work |             |
| Melt Flow Rate (230 °C/2,16 kg) | 25 g/10min                                     | ISO 1133    |
| Melting temperature (DSC)       | 161 °C                                         | ISO 11357-3 |
| Molecular weight distribution   | Very narrow                                    |             |

## Storage

**HG420FB** should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

More information on storage is found in our "Safety data sheet" / "Product safety information sheet".

## Safety

The product is not classified as dangerous.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety, recovery and disposal of the product. For more information, contact your Borealis representative.

## Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
