Solvay Engineering Plastics

Product Texts

Flame retardant Polyamide PA66 reinforced with 30% of glass fibre, for injection moulding.

This Red Phosphorous and Halogen free flame retardant grade, combines excellent all-round mechanical properties with outstanding flame retardancy (UL 94V-A at 1.6mm) and electrical performance. This product is

The long term thermal performance of this grade also make it ideal for under-the-bonnet Auto applications where it can withstand temperatures of 160°C for over 6000hrs. The thermal ageing value for this product in accordance to the IEC 216 RTI are the following;

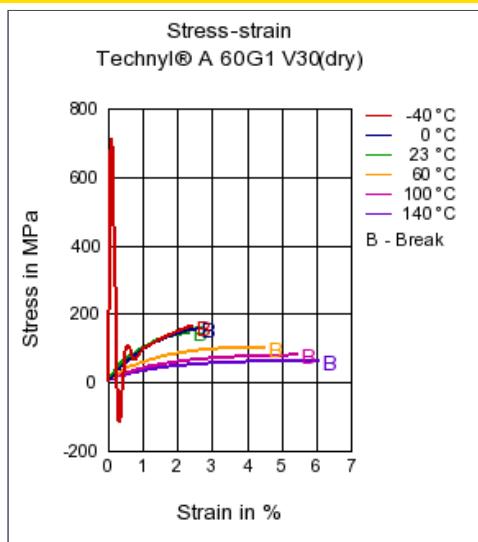

- Impact 160°C @ 6000hrs & 140 @ 20000hrs
- Strength 165°C @ 6000hrs & 145 @ 20000hrs
- Dielectric 160°C @ 6000hrs & 145 @ 20000hrs

This product is available in Natural, Grey and Black. Specific colours and Laser Marking grades optimised for YAG and UV laser types are also available upon request.

Injection Molding

The material is supplied in airtight bags, ready for use. In the case that the virgin material has absorbed moisture, it must be dried to a final moisture content of less than 0,2% with a dehumidified air drying equipment at approx 80°C.

Recommended moulding conditions :

Barrel temperatures:

- feed zone 260 - 270°C
- compression zone 260 - 270°C
- front zone 260 - 270°C

Mould temperatures: 60 - 80°C

For products containing Flame additives Solvay Engineering Plastics recommends the use of a CR19% C1.9% coating for the steels to prolong the life time of the processing equipment.
