General Information

Product Description

Material code according to ISO 1043-1: PP

Polypropylene with 60 weight percent ash content, long glass fibers reinforced. The fibers are chemically coupled to the polypropylene matrix. The pellets are cylindrical and normally as well as the embedded fibers 10 mm long. Concentrate for blending down on a fiber content of 20-30%

Parts molded of CELSTRAN have outstanding mechanical properties such as high strength and stiffness combined with high heat deflection. The notched impact strength is increased at elevated and low temperatures due to the fiber skeleton built in the parts. The long fiber reinforcement reduces creep significantly.

The very isotropic shrinkage in the molded parts minimizes the warpage.

Complex parts can be manufactured with high reproducibility by injection molding.

Application field: Functional/structural parts for automotive

General

Material Status	• Commercial: Active
Availability	• Europe • North America
Filler / Reinforcement	• Long Glass Fiber, 60% Filler by Weight
Features	• Chemically Coupled • High Stiffness • Creep Resistant • High Strength • Good Impact Resistance • Low Temperature Impact Resistance • Low Warpage
Uses	• Automotive Applications
RoHS Compliance	• Contact Manufacturer
Forms	• Pellets
Processing Method	• Injection Molding
Resin ID (ISO 1043)	• PP
