

# HYCLEANSE® 606PEL

## Entec Polymers - Thermoplastic

Wednesday, November 6, 2019

### General Information

#### Product Description

Purging agents concentrate for polycarbonate and PMMA applications.

HyCleanse-606PEL contains a unique chemical additive system targeted for applications where clarity must be maintained and resin contaminations are critical. Used at 10%, this additive Will remove all debris and because of its polarity, will not stay inside the barrel forcing processors to purge out the purging agent, an activity typical of most purges.

Applications: Compounding - Extrusion - Blow Molding
