

AuroraGuard™ FFD0062

Aurora Material Solutions, LLC - *Unspecified*

General Information

Product Description

Blowing Agent Concentrate for Use in Polyethylene and Polypropylene

Appearance:

- White Pellet

Description:

- Metal Organic Compound

Technical Data:

- Percent of Active Blowing Agent: 20%
- Decomposition Temperature: 150 to 200°C
- Gas Yield of Concentrate: 27 ml/gm at 250°C

Properties:

- Dust Free Pellet
- Compatibility with PE and PP
- Endothermic Decomposition
- No Plate Out on Screw and Mold
- Uniform Foam Structure

Application:

- Injection Molding
 - Antisink, Structural Foam Parts and Weight Reduction

Recommended Use Levels:

- Injection Molding
 - Antisink 0.5% to 5.0%

Formerly known as Chemblend FFD0062
