5. FIRE-FIGHTING MEASURES

- 5.1 Extinguishing Media** As appropriate for surrounding fire. Extinguish preferably with foam, water or dry chemical.
- 5.2 Unsuitable Extinguishing Media** CO₂ may be unsuitable due to lack of cooling capacity.
- 5.3 Fire Fighting Protective Equipment** A self contained breathing apparatus and suitable protective clothing should be worn in fire conditions.
- 5.4 Hazardous Decomposition Product(s)** Combustion or thermal decomposition will evolve toxic and irritant vapours. Combustion products may include carbon monoxide, carbon dioxide and hydrochloric acid vapors.
- 5.5 Special Exposure Hazards** Dust explosion may occur if not attended properly. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- 5.6 Other** Can melt and burn in a fire. Molten material tends to flow or drip and will propagate fire.

6. ACCIDENTAL RELEASE MEASURES

- 6.1 Personal Precautions** Caution - spillages may be slippery. Ensure suitable personal protection (including respiratory protection) during removal of spillages. Dust clouds are sensitive to ignition by electrostatic discharge.
- 6.2 Environmental Exposure Controls** Avoid release to the environment. Do not allow to enter drains, sewers or watercourses.
- 6.3 Methods for cleaning up**
Recovery:
 Recover the product by vacuuming. Shovel into suitable container for disposal. No sparking tools should be used. Sweep up to prevent slipping hazard.
Elimination:
 Recycle if possible. Destroy the product by incineration (in accordance with local and national regulations).

7. HANDLING AND STORAGE

- 7.1 HANDLING** **Technical measures/Precautions:**
 Control dust formation. Solids, with dusts able to explode when suspended in air. Ensure ventilation of work areas and extraction of dust or vapours likely to be given off during handling. Provide showers, eye-baths. Provide self-contained breathing apparatus nearby. Take precautionary measures against static discharges and provide electrical earthing of equipment.
- 7.2 STORAGE** Keep in a cool, well ventilated place. Keep away from moisture, heat and direct sunlight to maintain the technical properties of the product. This product should be kept away from naked flames and other sources of ignition.
- Storage Temperature:** Ambient.
Storage Life: Stable at ambient temperature.
Specific use: Industrial use only.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Provide adequate ventilation when using the material and follow the principles of good occupational hygiene to control personal exposures.

REON PVC

8.1 Respirators

No special requirements. Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Where engineering controls are not fitted or inadequate wear suitable respiratory protective equipment.

8.2 Eye Protection

Safety spectacles/goggles/full face shield.

8.3 Gloves

Wear suitable gloves if prolonged skin contact is likely. When dealing with heated material: Insulating gloves EN 407 (heat).

8.4 Other

Wear suitable protective clothing. Contaminated clothing should be thoroughly cleaned.

8.5 Environmental precautions

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
