

## SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006 (REACH)  
and Regulation (EU) No 2015/830

Revision date: 17/6/2016

Version: 13

Language: en-GB,IE

Date of print: 15/11/2016

### Novodur® ABS Pellets (Polycarbonate-modified)

Material number ABS007

Page: 1 of 9

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

Trade name: Novodur® ABS Pellets (Polycarbonate-modified)  
This safety data sheet pertains to the following products:  
Novodur® Ultra 4105  
Novodur® Ultra 4140PG  
Novodur® 5300  
Novodur® H801

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

General use: For the production of moulded plastic articles  
Reserved for industrial and professional use.

### 1.3 Details of the supplier of the safety data sheet

Company name: INEOS Styrolution Group GmbH  
Street/POB-No.: Mainzer Landstraße 50  
Postal Code, city: 60325 Frankfurt  
Germany  
WWW: [www.styrolution.com](http://www.styrolution.com)  
Dept. responsible for information:  
Infopoint, Telephone: +49 (0) 2133 - 51- 4007  
E-mail: [infopoint.emea@styrolution.com](mailto:infopoint.emea@styrolution.com)

### 1.4 Emergency telephone number

Telephone: +44 (0) 1235 239 670

## SECTION 2: Hazards identification

### 2.1 Classification of the substance or mixture

#### Classification according to EC regulation 1272/2008 (CLP)

This mixture is classified as not hazardous.

### 2.2 Label elements

#### Labelling (CLP)

Hazard statements: not applicable

Precautionary statements: not applicable

## 2.3 Other hazards

Under the recommended processing conditions small amounts of emitted substance (e.g. residual monomers, residual solvents, decomposition products) may be discharged. In succession of overheating during the melting process potentially substances are released, which are considered as harmful and carcinogen. The maximum workplace exposure limits are, where necessary, listed in section 8.

The melted product can cause severe burns.

Results of PBT and vPvB assessment:

No data available

## SECTION 3: Composition / information on ingredients

3.1 Substances: not applicable

### 3.2 Mixtures

Chemical characterisation: A blend of polymers based on acrylonitrile butadiene styrene/bisphenol A - polycarbonate copolymer

Additional information: Preparation does not contain dangerous substances above limits that need to be mentioned in this section according to applicable legislation.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

General information: Immediately remove any contaminated clothing, shoes or stockings.

In case of inhalation: In case of inhalation of decomposition products, affected person should be moved into fresh air and kept still. In case of breathing difficulties administer oxygen. If breathing has stopped, give artificial respiration immediately. Seek medical attention.

Following skin contact: After contact with molten product, cool skin area rapidly with cold water. Do not use force or solvents to remove product incrustations from affected skin areas. Cover with sterile dressing material to protect against infection. Seek medical attention.

After eye contact: Immediately flush eyes with plenty of flowing water for 10 to 15 minutes holding eyelids apart. In case of troubles or persistent symptoms, consult an ophthalmologist.

After swallowing: Rinse mouth with water. Drink one or two glasses of water.  
Never give an unconscious person anything through the mouth. seek medical attention

### 4.2 Most important symptoms and effects, both acute and delayed

The melted product can cause severe burns.

Thermal treatment, Processing: Can cause skin, eye and respiratory tract irritation.

### 4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

Suitable extinguishing media::

Water fog, foam, dry extinguishing powder, carbon dioxide.

## 5.2 Special hazards arising from the substance or mixture

In case of fire may be liberated:

Chlorine decomposition products, nitrogen oxides (NO<sub>x</sub>), carbon monoxide and carbon dioxide.

## 5.3 Advice for firefighters

Special protective equipment for firefighters:

Wear self-contained breathing apparatus. Suitable protective clothing.

Additional information:

Hazchem-Code: -

Seal off endangered area. Remove persons to safety.

Do not allow water used to extinguish fire to enter drains, ground or waterways.

# SECTION 6: Accidental release measures

## 6.1 Personal precautions, protective equipment and emergency procedures

Keep the molten mass away from the eyes and the skin.

Where there is a risk of exothermal decomposition as a result of overheating (rise in temperature, formation of fumes or smoke) cool the melt in a water bath. Do not breathe vapours. Provide adequate ventilation. Provide a conveniently located respiratory protective device.

## 6.2 Environmental precautions

Avoid release to the environment.

## 6.3 Methods and material for containment and cleaning up

Take up mechanically.

Additional information:

Granulate: Special danger of slipping by leaking/spilling product.

## 6.4 Reference to other sections

Refer additionally to section 8 and 13.

# SECTION 7: Handling and storage

## 7.1 Precautions for safe handling

Advices on safe handling: In case of melting: To avoid thermal decomposition, do not overheat.

Make sure there is sufficient air exchange and / or that working rooms are air suctioned.

Avoid exceeding WEL threshold levels. Do not breathe vapours.

After work, wash hands and face.

For mechanical processing:

Do not breathe dust. Vent dust from the work area.

Avoid dust formation during regrainulation.

## 7.2 Conditions for safe storage, including any incompatibilities

Requirements for storerooms and containers:

Keep container dry. Store only in original container.

## 7.3 Specific end use(s)

No information available.

## SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006 (REACH)  
and Regulation (EU) No 2015/830

Revision date: 17/6/2016

## SECTION 8: Exposure controls/personal protection

## 8.1 Control parameters

Occupational exposure limit values:

| CAS No.  | Designation                 | Type                    | Limit value                      |
|----------|-----------------------------|-------------------------|----------------------------------|
| 100-41-4 | Ethylbenzene                | Europe: IOELV: STEL     | 884 mg/m <sup>3</sup> ; 200 ppm  |
|          |                             | Europe: IOELV: TWA      | 442 mg/m <sup>3</sup> ; 100 ppm  |
|          |                             | Great Britain: WEL-STEL | 552 mg/m <sup>3</sup> ; 125 ppm  |
|          |                             | Great Britain: WEL-TWA  | 441 mg/m <sup>3</sup> ; 100 ppm  |
|          |                             | Ireland: 15 minutes     | 884 mg/m <sup>3</sup> ; 200 ppm  |
|          |                             | Ireland: 8 hours        | 442 mg/m <sup>3</sup> ; 100 ppm  |
| 100-42-5 | Styrene                     | Great Britain: WEL-STEL | 1080 mg/m <sup>3</sup> ; 250 ppm |
|          |                             | Great Britain: WEL-TWA  | 430 mg/m <sup>3</sup> ; 100 ppm  |
|          |                             | Ireland: 15 minutes     | 170 mg/m <sup>3</sup> ; 40 ppm   |
|          |                             | Ireland: 8 hours        | 85 mg/m <sup>3</sup> ; 20 ppm    |
| 107-13-1 | Acrylonitrile               | Great Britain: WEL-TWA  | 4.4 mg/m <sup>3</sup> ; 2 ppm    |
|          |                             | Ireland: 8 hours        | 4.5 mg/m <sup>3</sup> ; 2 ppm    |
| 106-99-0 | 1,3-Butadiene               | Great Britain: WEL-TWA  | 22 mg/m <sup>3</sup> ; 10 ppm    |
|          |                             | Ireland: 8 hours        | 2.2 mg/m <sup>3</sup> ; 1 ppm    |
| 108-95-2 | Phenol                      | Europe: IOELV: STEL     | 16 mg/m <sup>3</sup> ; 4 ppm     |
|          |                             | Europe: IOELV: TWA      | 8 mg/m <sup>3</sup> ; 2 ppm      |
|          |                             | Great Britain: WEL-STEL | 16 mg/m <sup>3</sup> ; 4 ppm     |
|          |                             | Great Britain: WEL-TWA  | 7.8 mg/m <sup>3</sup> ; 2 ppm    |
|          |                             | Ireland: 15 minutes     | 16 mg/m <sup>3</sup> ; 4 ppm     |
|          |                             | Ireland: 8 hours        | 8 mg/m <sup>3</sup> ; 2 ppm      |
| 80-05-7  | 4,4'-Isopropylidenediphenol | Europe: IOELV: TWA      | 10 mg/m <sup>3</sup>             |
|          |                             | Great Britain: WEL-TWA  | 10 mg/m <sup>3</sup>             |
|          |                             | Ireland: 8 hours        | 10 mg/m <sup>3</sup>             |
| 108-90-7 | Chlorobenzene               | Europe: IOELV: STEL     | 70 mg/m <sup>3</sup> ; 15 ppm    |
|          |                             | Europe: IOELV: TWA      | 23 mg/m <sup>3</sup> ; 5 ppm     |
|          |                             | Great Britain: WEL-STEL | 14 mg/m <sup>3</sup> ; 3 ppm     |
|          |                             | Great Britain: WEL-TWA  | 4.7 mg/m <sup>3</sup> ; 1 ppm    |
|          |                             | Ireland: 15 minutes     | 70 mg/m <sup>3</sup> ; 15 ppm    |
|          |                             | Ireland: 8 hours        | 23 mg/m <sup>3</sup> ; 5 ppm     |
| 100-40-3 | 4-Vinylcyclohexene          | Ireland: 8 hours        | 0.4 mg/m <sup>3</sup> ; 0.1 ppm  |

Biological limit values:

| CAS No.  | Designation | Type               | Limit value         | Parameter | Sampling       |
|----------|-------------|--------------------|---------------------|-----------|----------------|
| 108-95-2 | Phenol      | Europe: BLV, urine | 120 mg/g creatinine | phenol    | no restriction |

Additional information:

The product contains very low levels of residual monomers and process chemicals (styrene, ethylbenzene, acrylonitrile, phenol, 4,4'-Isopropylidenediphenol, Chlorobenzene, vinylcyclohexene, butadiene) that may be evolved during thermal processing, along with possible decomposition products. As the identity and levels of these impurities evolved will depend upon the processing conditions (temperature etc.) it is the responsibility of the user to determine the adequacy of any protection or safety measures.

## 8.2 Exposure controls

Provide good ventilation in the work area. Additional controls are not normally necessary when handling the polymer.

Thermal extrusion: Provide local exhaust ventilation to ensure that the workplace exposure limit is not exceeded.

Use of respiratory protection may be necessary during maintenance activities.

## Personal protection equipment

### Occupational exposure controls

Respiratory protection: Respiratory protection must be worn whenever the WEL levels have been exceeded. Use filter type A-P2 according to EN 14387.

Hand protection: Protective gloves according to EN 374.  
Glove material: Nitrile rubber - Layer thickness. 0.11 mm.  
Breakthrough time: >480 min.  
Observe glove manufacturer's instructions concerning penetrability and breakthrough time.  
In case of melting: Impervious heat protective gloves according to EN 407.  
Glove material: Leather  
Observe glove manufacturer's instructions concerning penetrability and breakthrough time.

Eye protection: Tightly sealed goggles according to EN 166.

Body protection: Wear suitable protective clothing.  
In case of dust formation: Overall

General protection and hygiene measures:  
Change contaminated clothing.  
Wash contaminated clothing prior to re-use.  
When using do not eat, drink or smoke.  
Wash hands before breaks and after work.  
Safety shower and eye wash station should be easily accessible to the work area.

## Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## SECTION 9: Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

|                                          |                                                                 |
|------------------------------------------|-----------------------------------------------------------------|
| Appearance:                              | Form: solid, granulate<br>Colour: varying, depends on colouring |
| Odour:                                   | characteristic                                                  |
| Odour threshold:                         | No data available                                               |
| pH value:                                | No data available                                               |
| Melting point/freezing point:            | (Softening temperature) 100 - 115 °C                            |
| Initial boiling point and boiling range: | No data available                                               |
| Flash point/flash point range:           | No data available                                               |
| Evaporation rate:                        | No data available                                               |
| Flammability:                            | No data available                                               |
| Explosion limits:                        | No data available                                               |

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

exothermic reactions

### 10.2 Chemical stability

Stable under recommended storage conditions.

### 10.3 Possibility of hazardous reactions

No hazardous reactions known.

### 10.4 Conditions to avoid

Heating (Decomposition).

### 10.5 Incompatible materials

none

### 10.6 Hazardous decomposition products

In case of fire may be liberated:

Chlorine decomposition products, nitrogen oxides (NO<sub>x</sub>), carbon monoxide and carbon dioxide.

Thermal decomposition: > 300 °C

## SECTION 11: Toxicological information

### 11.1 Information on toxicological effects

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Other information:     | When handled appropriately, even after long years of experience with this product, no adverse health effects are known.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

### Symptoms

The melted product can cause severe burns.  
Thermal treatment, Processing: Can cause skin, eye and respiratory tract irritation.

## SECTION 12: Ecological information

### 12.1 Toxicity

Further details: No data available

### 12.2. Persistence and degradability

Further details: Product is not readily biodegradable.  
Due to the consistency along with the low water solubility of the product a bioavailability is unlikely.

### 12.3 Bioaccumulative potential

Partition coefficient: n-octanol/water:  
No data available

### 12.4 Mobility in soil

No data available

### 12.5 Results of PBT and vPvB assessment

No data available

### 12.6 Other adverse effects

General information: Discharge into the environment must be avoided.

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

#### Product

Waste key number: 07 02 13 = Waste plastic

Recommendation: Recycling or special waste incineration.  
After appropriate treatment the product can be remelted and reprocessed into new moulded articles. Mechanical recycling is only possible if the material has been selectively retrieved and carefully segregated according to type.

#### Contaminated packaging

Recommendation: Non-contaminated packages may be recycled. If recycling is not practicable, dispose of in compliance with local regulations.

## SECTION 14: Transport information

### 14.1 UN number

ADR/RID, IMDG, IATA-DGR:  
not applicable

### 14.2 UN proper shipping name

ADR/RID, IMDG, IATA-DGR:  
Not restricted

### 14.3 Transport hazard class(es)

ADR/RID, IMDG, IATA-DGR:  
not applicable

### 14.4 Packing group

ADR/RID, IMDG, IATA-DGR:  
not applicable

### 14.5 Environmental hazards

Marine pollutant: no

### 14.6 Special precautions for user

No dangerous good in sense of these transport regulations.
