# VESTAMID® L-GF15

## GLASS FIBRE REINFORCED (15%) PA12 RESIN FOR THE INJECTION MOULDING OF RIGID AND TOUGH PARTS

**VESTAMID® L-GF15 NC** is a glass fiber –reinforced heat stabilized Polyamide 12 for injection molding. The material contains about 15% glass fibers, an ageing protective agent and a processing aid for a fast and even form filling. Due to the reinforcement moldings from this compound exhibit a higher strength and good heat resistance, excellent for gear housings for electric window openers in cars.

Further advantages of VESTAMID® L-GF15 NC are the characterizing properties of PA12, e.g., low water absorption, good dimensional stability and nearly constant mechanical properties at changing ambient humidity.

VESTAMID® L-GF15 NC is supplied as cylindrical granules, ready for processing, in moisture-proof bags.

The use of colorants may change property values.

Inside the original and undamaged packaging, the product has a shelf life of at least 2 years when stored in dry rooms at temperatures not exceeding 30°C.

### Key Features

#### Industrial Sector

Automotive and Mobility, Industry and Engineering

#### Electrical

Insulating

#### Processing

Injection molding

#### Conformity

Automotive

#### Delivery form

Pellets, Granules

#### Additives

Glass fibers, Lubricant

#### Resistance to

Heat (thermal stability), Oil / fuels
