

PREBLACK CP 732-40

0711

PREBLACK CP 732-40 black universal masterbatch has been developed for the colouring of injection moulded and extruded products made e.g. out of polyolefines, polystyrenes, ABS, PVC, PA, PC and POM.

Due to the good homogeneity of PREBLACK CP 732-40, it is well suited for demanding applications.

According to BgVV regulations PREBLACK CP 732-40 is approved for use in contact with foodstuffs, as long as the carbon black content of the produced product is less than 2,5 %.

Appearance	Granule
Carrier	Copolymer
Pigmentation	General purpose carbon black (SRF-type), 40%
Density	1.2 g/cm ³
Light fastness	8, very good
Temperature stability	< 300 °C
Dosing	0.5 - 10 % depending on desired blackness and UV-protection
Moisture content	Max. 0.15% when produced
Packaging	1250 kg in 25 kg PE valve bags on a one-way stretch wrapped pallet.
Storage	Can be stored for one year in its original package. Packages should be stored indoors.

The information in this data sheet represents typical values obtained by us and should not be regarded as a specification.

We condition that the product will be inspected and qualified by the customer for his process to meet the specific requirements set by application, processing equipment and end product.
