

## Hostalen PP H1022

### Polypropylene, Impact Copolymer

#### Product Description

**Hostalen PP H1022** is a natural, basic stabilisation polypropylene blockcopolymer with high melt viscosity and excellent low-temperature impact strength.

For regulatory information please refer to *Hostalen* PP H1022 Product Stewardship Bulletin (PSB)  
Hostalen PP H1022 is not intended for medical and pharmaceutical applications.

#### Product Characteristics

|                                      |   |
|--------------------------------------|---|
| <b>Status</b>                        | Commercial: Active  |
| <b>Test Method used</b>              | ISO   |
| <b>Availability</b>                  | Europe  |
| <b>Processing Methods</b>            | Extrusion Blow Molding, Extrusion Pipe Sheet and Semi Finished Products |
| <b>Features</b>                      | Antioxidant, Block Copolymer  |
| <b>Typical Customer Applications</b> | Industrial  |

| Typical Properties                                  | Method        | Value | Unit              |
|---|---------------|-------|-------------------|
| <b>Physical</b>                                     |               |       |                   |
| Density   | ISO 1183      | 0.901 | g/cm <sup>3</sup> |
| Melt flow rate (MFR)                                | ISO 1133      |       |                   |
| (230 °C/2.16Kg)                                     |               | 0.3   | g/10 min          |
| (190 °C/5.0kg)                                      |               | 0.5   | g/10 min          |
| (230 °C/5.0kg)                                      |               | 1.3   | g/10 min          |
| <b>Mechanical</b>                                   |               |       |                   |
| Tensile Modulus (23 °C, v = 1 mm/min, Secant)       | ISO 527-1, -2 | 1300  | MPa               |
| Tensile Stress at Yield (23 °C, v = 50 mm/min)      | ISO 527-1, -2 | 30    | MPa               |
| Tensile Strain at Yield (23 °C, v = 50 mm/min)      | ISO 527-1, -2 | 13    | %                 |
| <b>Impact</b>                                       |               |       |                   |
| Charpy notched impact strength                      | ISO 179       |       |                   |
| (-20 °C)  |               | 4     | kJ/m <sup>2</sup> |
| (23 °C)   |               | 50    | kJ/m <sup>2</sup> |
| (0 °C)  |               | 15    | kJ/m <sup>2</sup> |
| (-30 °C)  |               | 3     | kJ/m <sup>2</sup> |
| <b>Hardness</b>                                     |               |       |                   |
| Shore hardness (Shore D (3 sec))                    | ISO 868       | 63    |                   |
| Ball indentation hardness (H 132/30)                | ISO 2039-1    | 55    | MPa               |
| <b>Thermal</b>                                      |               |       |                   |
| Heat deflection temperature B (0.45 MPa) Unannealed | ISO 75B-1, -2 | 93    | °C                |
| Vicat softening temperature (VST/A/50 K/h (10 N))   | ISO 306       | 159   | °C                |
| Melting Temperature                                 | ISO 3146      | 164   | °C                |

#### Additional Properties

#### Processing:

(+) 188 1699 6168  
hongrunplastics.com

The recommended conditions will depend on the material and the size and wall thickness of the pipe or profile required.

Recommended melt temperatures: 200-230 °C

Recommended injection moulding temperatures: 200-280 °C

#### Notes

Typical properties; not to be construed as specifications.
