

## UKRAINE SITUATION –

August 2022

Dear valued customer,

We would like to provide you with an update regarding your Ravago Manufacturing Europe product supply in light of the Ukraine/Russia situation.

First and foremost, the safety and well-being of our employees, customers and partners on the ground are our number one concern and priority. Please be aware that we are monitoring the situation closely to mitigate any business risks as well.

It is important to highlight that Ravago Manufacturing Europe does not have any manufacturing facility in the Ukraine or Russia. Our Manufacturing operations across Europe are not directly affected by the current situation in Ukraine.

However the war in Ukraine and the resulting sanctions against Russia are having an impact on the availability of natural gas in Europe. We ask you to examine and assess the potential impact of a potential natural gas shortage on your production processes concerning materials delivered.

**Please continuously monitor your energy sources and prepare alternative supply, and let us know by August 5<sup>th</sup> 2022 how your company is preparing.**

In case that your company is or will be facing difficulties in supply or production, please let us know, in order to define and establish potential counter measures, if necessary.

For further information, please continue to stay in close contact with your sales representative.
