

AMPLIFY™ TY 1052H

The Dow Chemical Company - Functional Polymer

Sunday, November 3, 2019

General Information

Product Description

AMPLIFY[™] TY 1052H Functional Polymer is a maleic anhydride grafted (MAH) polymer concentrate designed as a blend component for unmodified polyethylene and polypropylene. In tie layers for flexible packaging, AMPLIFY TY 1052H Functional Polymer promotes adhesion of polyethylene and polypropylene to barrier polymers such as polyamide and ethylene vinyl alcohol (EVOH). The functionality of this polymer also promotes adhesion between metal, polyolefins, cellulose, polyester, polycarbonate, glass, and foil.

Typical blending levels in polyethylene let-down resin are 20-25% for EVOH and 10-15% for nylon.

Main Characteristics:

- · Adhesive concentrate for use in blown, cast, and coating applications
- Tie layer for food packaging and pipe coating
- · Adhesive layer in multi-layer flexible film applications
- · Polymer compatibilizer

Complies with:

- U.S. FDA 21 CFR 175.105
- EU, No 10/2011

Consult the regulations for complete details.

General			
Material Status	Commercial: Active		
Availability	Asia PacificEurope	Latin AmericaNorth America	
Additive	Antiblock: No	 Processing Aid: No 	Slip: No
Agency Ratings	• EU No 10/2011	• FDA 21 CFR 175.105	
Forms	Pellets		

ASTM & ISO Properties ¹
