

HYBOOST® 298

Entec Polymers - Black Pigment Masterbatch

Sunday, November 3, 2019

General Information

Product Description

HyBoost-298 is a finely dispersed FDA grade carbon black in a prime LLDPE carrier resin for ease of incorporation into a final product. HyBoost-298 is a fine particle size black with a nice depth of color.

Description

Masterbatch Black concentrate based on PE with 35% FDA Carbon Black blend.

Applications

HyBoost-298 can be used in a wide variety of processes such as films, injection molding, blow molding and other processes.

General

Material Status	• Commercial: Active
Availability	• North America
Agency Ratings	• FDA Food Contact, Unspecified Rating

ASTM & ISO Properties ¹

Additives General		Nominal Value	Unit
Additives Category	Masterbatch -- Pigment -- Black		
Carrier Resin	Polyethylene or ethylene-olefin copolymer (PE)		
Additives Physical		Nominal Value	Unit
Additive Concentration		35	%
Chemical Description	Carbon Black		

Notes

¹ Typical properties: these are not to be construed as specifications.
