General Information

Product Description

INFUSE™ 9817 Olefin Block Copolymer is a high performance olefin block copolymer that offers excellent performance in durable, flexible injection molded industrial and consumer goods. INFUSE 9817 has a higher set up temperature, which allows for faster injection molding cycle times. In addition, its high crystallization temperature and lower density drive to lower production cost by reducing cycle time and reducing part weight.

Main Characteristics:

- High upper service temperature performance
- · Highly flexible with good elastic recovery
- · General purpose elastomer
- · Excellent for compounds and blends
- · Reduced part weight
- · Talc dusted

Complies with

- EU, No 10/2011
- U.S. FDA FCN 424

Consult the regulations for complete details.
