1 Introduction

This document is a user guide for the "Safety Data Sheets" application, a website where you can consult the Safety Data Sheets of Eni spa products sold.

The site can be reached via the URL <https://msds.eni.com> or from the eni.com portal.

2 Requirements

"Safety Data Sheets" is an internet tool that does not require enabled customers to install any software.

The only components needed are a browser(Microsoft Internet Explorere 7,8,9 or 10 or Google Chrome 35 and Apple Safari) , Adobe Reader (or an equivalent pdf file reader) and a program for extracting .zip files.

3 Language

The language selection bar is visible in all the pages, at the top, and allows the language to be changed (ITA, ENG, FR, DE, ES, PT, DA, NO, SW, FI, NL).

REACH Regulation

The purpose of REGULATION (EC) no. 1907/2006 (REACH Regulation-Title I, Article 1) is to ensure a high level of protection of human health and the environment.

[To find out more](#)

Product Stewardship

Product Stewardship represents the responsible management of products throughout their whole life cycle; it is based on the principles of prevention and protection of workers, populations and the environment, and on guaranteeing the transfer of information to all stakeholders.

4 Searching for and Downloading an SDS

To search for and download a Safety Data Sheet – abbreviated hereinafter as SDS – the application provides a search form, accessed directly from the Home Page, containing the following fields:

- Legal Entity of Reference
- Data Sheet Language
- Commercial Name of the Product
- Chemical Name of the Product
- Data Sheet Code
- SAP Code (loose product code)

To search for and download a SDS.

The screenshot shows a web form titled "Safety Data Sheets" with a yellow header. The form is divided into several sections. The "Legal Entity" section has a dropdown menu with "Eni S.p.A." selected. The "SDS Language" section has a dropdown menu. The "Commercial Name" section has a text input field. The "Name of chemical (only for substances)" section has a text input field. The "SDS Code" and "SAP Code" sections each have a text input field. A blue "start search" button is located at the bottom right of the form.

The only mandatory field in the form is the Legal Entity. The search uses the AND operator to relate the completed fields to one another. All available fields are set to autocomplete: it is sufficient to type several letters and the system will propose several options intended to identify the product of interest. If the search returns more than fifty results, the message "Search results exceed 50 items. Please refine your search" will appear.

- get an indication of the hazardousness of the product in question. If a product has been classified as hazardous, the  icon will be shown
- get an indication of obsolete products ¹. If a product is obsolete, the  icon will appear next to its commercial name
- get an indication of the historic SDS code.² (This is the code which was assigned to Eni spa products in the previous system). If a product has a historic code, the  icon will appear next to its SDS code, its tooltip showing the historic code.

¹ Following the cessation of a product, a period (1 year) called the obsolescence period runs, starting from the date of cessation. The products in this phase are called obsolete. During this period the SDSs for the products remain available and can be consulted using the SDS site. Once the obsolescence period has passed, the SDS for such products are no longer available and cannot be consulted.

² The historic SDS code is the code which was assigned to Eni spa products in the previous system. This code is valid only for SDSs imported from the previous system.

- view a pdf file of the SDS by clicking on the  icon
- add to the cart the SDS of interest which you would like to download in bulk using the  button. Upon adding the SDS to the cart, the button is transformed into the  icon. By clicking on this button again, you can remove the SDS in question from the cart. By clicking on the "Add All" button located at the top of the column, all the SDS returned by the search will be selected and the button will change to become "Remove All". In this case, all the SDS returned by the search will be removed from the cart.
